Product list valid from 01.09.2012  
Please ask for evaluation samples under [info@milananalytica.ch](mailto:info@milananalytica.ch)

Product	Article number
Abnormal activated partial thromboplastin time (APTT) Plasma	198
Abnormal prothrombin time (PT) human plasma	196
Afibrinogenemia plasma, acquired	1330
Afibrinogenemia plasma, congenital	142
alpha-2 antiplasmin deficient human plasma (acquired)	188
alpha-2 antiplasmin deficient human plasma (congenital)	189
alpha-2 antiplasmin depleted plasma	1356
Anti prothrombin antibody human plasma	192
Anticoagulant human plasma, Agatroban (direct thrombin inhibitor)	125
Anticoagulant human plasma, Bivalarudin (direct thrombin inhibitor)	127
Anticoagulant human plasma, Leparudin (direct thrombin inhibitor)	126

Antiphospholipid antibody positive human plasma	193
Antithrombin deficiency human plasma (congenital)	176
Antithrombin deficient human plasma (acquired)	177
D-Dimer human plasma, set (30 x 1 mL)	131
D-Dimer positive human plasma	132
D-Dimer positive human plasma, EDTA	134
D-Dimer positive human plasma, ultra high (>10,000ng/ml)	133
D-Dimer positive plasma, DIC (disseminated intravascular coagulation)	200
D-Dimer positive human plasma, positive deep vein thrombosis (DVT)/pulmonary embolism (PE) Diagnosis	199
DIC (disseminated intravascular coagulation) plasma, not D-Dimer positive	1327
Dysfibrinogenemia plasma, acquired	1329
Dysfibrinogenemia plasma, congenital	141
Elevated anti-cardiolipin antibody (ACA) human plasma	220
Elevated anti-cardiolipin antibody (ACA) human serum	221
Erythrocytes (Red Cells)	811
Expired human red blood cells	600
Factor II deficient human plasma (acquired)	147
Factor II deficient human plasma (congenital)	143
Factor II high human plasma (acquired)	155
Factor II high human plasma (congenital)	151
Factor IX and von Willebrand Factor deficient human plasma (congenital)	164
Factor IX deficient plasma (congenital)	162
Factor IX high human plasma (acquired)	160
Factor IX inhibitor human plasma (Bethesda)	172
Factor V deficient human plasma (acquired)	148
Factor V deficient plasma (congenital)	144
Factor V deficient plasma, high (acquired)	156
Factor V high deficient plasma (acquired)	152
Factor VII deficient human plasma (acquired)	149
Factor VII deficient plasma (congenital)	145
Factor VII deficient plasma (congenital), patient not under anti-vitamin K therapy	1294
Factor VII high deficient plasma (acquired)	153
Factor VII high human plasma (acquired)	157
Factor VIII and von Willebrand Factor deficient human plasma (congenital)	163
Factor VIII deficient human plasma (acquired)	1321
Factor VIII deficient human plasma (congenital)	161

Factor VIII high human plasma (acquired)	159
Factor VIII inhibitor human plasma (Bethesda)	171
Factor X deficient human plasma (acquired)	150
Factor X deficient human plasma (congenital)	146
Factor X high human plasma (acquired)	158
Factor X high human plasma (congenital)	154
Factor XI deficient human plasma (acquired)	169
Factor XI deficient human plasma (congenital)	167
Factor XII deficient human plasma (acquired)	170
Factor XII deficient human plasma (congenital)	168
Factor XIII deficient plasma (congenital)	173
Factor XIII high deficient plasma (acquired)	1295
Fibrinogen linearity set, human plasma	140
Fletcher factor (prekallikrein) deficient human plasma (congenital)	605
Fletcher factor (prekallikrein) deficient human serum (congenital)	604
Hemophilia plasma	694
Hemophilia serum	695
Heparin therapy human plasma (activated partial thromboplastin time APTT)	128
Heparin therapy human plasma (Anti factor Xa level)	129
High antithrombin human plasma	178
High factor II human plasma (G20210A FII mutation+)	185
High fibrinogen plasma	138
High molecular weight kininogen deficiency plasma (acquired)	209
High molecular weight kininogen deficiency plasma (congenital)	210
Human plasma, Heparin induced Thrombocytopenia (HIT), positive	9
Human plasma, unfractionated Heparin	1304
Human plasma, von Willebrand factor (vWF) activity, ristocetin cofactor activity, vWF:RCO, vWF:RIPA	1297
Human platelets	599
Icterus positive human plasma (bilirubin)	201
Low fibrinogen human plasma	136
Low molecular weight heparin human plasma	1307
Low molecular weight heparin human plasma - Fondaparinux (Arixtra)	124
Low molecular weight heparin human plasma - Fragmin	121
Low molecular weight heparin human plasma - Innohep	123
Low molecular weight heparin human plasma - Lovonox	122
Oral anticoagulant plasma	120

Plasminogen deficient human plasma (acquired)	186
Plasminogen deficient human plasma (congenital)	187
Prekallikrein deficiency human plasma (acquired)	207
Prekallikrein deficiency human plasma (congenital)	208
Protein C deficient human plasma (acquired)	180
Protein C deficient human plasma (congenital)	179
Protein S deficient human plasma (acquired)	182
Protein S deficient human plasma (congenital)	181
Protein S high deficient human plasma	1296
Prothrombin human plasma (IgM & IgG)	245
Resistance to activated protein C (aPCR), heterozygous, human plasma	183
Resistance to activated protein C (aPCR), homozygous, human plasma	184
Special control human plasmas - Plasminogen activator inhibitor-1 (PAI-1)	206
Special control human plasmas - prothrombin fragment 1.2 (PF 1.2 )	205
Special control human plasmas - thrombin/antithrombin complex (TAT)	204
Ultra high fibrinogen plasma (>1000 mg/dl)	139
Ultra low fibrinogen human plasma (<100 mg/dl), acquired	1328
Ultra low fibrinogen human plasma (<100 mg/dl), congenital	137
Vitamin K deficiency human Plasma	195
von Willebrand Factor (vWF) deficient plasma	1303
von Willebrand Factor (vWF) deficient plasma, immuno depleted	1298
von Willebrand Factor plasma, elevated vWF concentration	10
Von Willebrands Disease (Type 3)	166
Von Willebrands Disease Subtypes (Type 2)	165
